RESEARCH/LAB EXPERIENCE

Human Development Lab - Dr. Freud, Florida Atlantic University

Developmental changes in social cognition and brain function

Conducted research to examine developmental changes in the ability to process socially relevant information from human faces, such as identity, race, and age using a variety of techniques including eye-tracking, ERP/EEG, and fMRI.

Perception & Cognition Lab - Dr. Kohlberg and Dr. Erikson, Florida Atlantic University

Memory formation and processing

Conducted research to examine the interactions between cellular networks of the limbic thalamus underlie complex processes like the retrieval of memory, its use in learning, or the modulation of learning and memory by internal states (emotion, sleep). Our research techniques included electrophysiology in rat behavior as well as optogenetics and statistical modeling.
